Regulations of 1 December 1975 No. 5
for Preventing Collisions at Sea
(Rules of the Road at Sea)

Chapter I
International regulations for preventing collisions at sea

Part A. Generals

Rule 1
Application

(a) These Rules shall apply to all vessels upon the high seas and in all waters connected there with navigable by sea-going vessels.

(b) Nothing in these Rules shall interfere with the operation of special rules made by an appropriate authority for roadsteads, harbours, rivers, lakes or inland waterways connected with the high seas and navigable by sea-going vessels. Such special rules shall conform as closely as possible with international rules.

(c) Nothing in these Rules shall interfere with the operation of any special rules made by the government of any state with respect to additional station or signal lights, shapes or whistle signals for ships of war and vessels proceeding under convoy, or with respect to additional station or signal lights or shapes for fishing vessels engaged in fishing as a fleet. These additional station or signal lights, shapes or whistle signals shall, so far as possible, be such that they cannot be mistaken for any light, shape or signal authorized elsewhere under these Rules.

(d) Traffic separation schemes may be adopted by the Organization for the purpose of these Rules.

(e) Whenever a country’s government has determined that a vessel of special construction or purpose cannot comply fully with the provisions of any one of these Rules with respect to the number, position, range or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signalling appliances, the vessel shall comply with such other provisions in regard to the number, position, range or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signalling appliances, as the government in question has determined to be in the closest possible compliance with these Rules in respect to that vessel.

1 Pursuant to Article II paragraph 3 of the Convention on International Regulations for preventing Collisions at Sea, 1972, the «Organization» means the Inter-governmental Maritime Consultative Organization, usually abbreviated and referred to as «IMCO».

Rule 2
Responsibility

(a) Nothing in these Rules shall exonerate any vessel, the company, master or other persons working on board, from the consequences of any neglect to comply with these Rules or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.
In interpreting and complying with these Rules, due regard shall be had to all dangers of navigation and collision and to any special circumstances, including the manoeuvring limitations of the vessel involved, which may make a departure from these Rules necessary to avoid immediate danger.

**Rule 3**

*General definitions*

For the purpose of these Rules, except where the context otherwise requires:

(a) The word *vessel* includes every description of water craft, including non-displacement craft, WIG craft and seaplanes, used or capable of being used as a means of transportation on water.

(b) The term *power-driven vessel* means any vessel propelled by machinery.

(c) The term *sailing vessel* means any vessel under sail provided that propelling machinery, if fitted, is not being used.

(d) The term *vessel engaged in fishing* means any vessel fishing with nets, lines, trawls or other fishing apparatus which restrict manoeuvrability, but does not include a vessel fishing with trolling lines or other fishing apparatus which do not restrict manoeuvrability.

(e) The word *seaplane* includes any aircraft designed to manoeuvre on water.

(f) The term *vessel not under command* means a vessel which through some exceptional circumstance is unable to manoeuvre as required by these Rules and is therefore unable to keep out of the way of another vessel.

(g) The term *vessel restricted in her ability to manoeuvre* means a vessel which from the nature of her work is restricted in her ability to manoeuvre as required by these Rules and is therefore unable to keep out of the way of another vessel.

   The term vessels restricted in their ability to manoeuvre shall include, but not be limited to:

   (i) a vessel engaged in laying, servicing or picking up a navigation mark, submarine cable or pipeline;

   (ii) a vessel engaged in dredging, surveying or underwater operations;

   (iii) a vessel engaged in replenishment or transferring persons, provisions or cargo while underway;

   (iv) a vessel engaged in the launching or recovery of aircraft;

   (v) a vessel engaged in mineclearance operations;

   (vi) a vessel engaged in a towing operation such as severely restricts the towing vessel and her tow in their ability to deviate from their course.

(h) The term *vessel constrained by her draught* means a power-driven vessel which, because of her draught in relation to the available depth and width of navigable water, is severely restricted in her ability to deviate from the course she is following.

(i) The word *underway* means that a vessel is not at anchor, or made fast to the shore or aground.

(j) The words *length* and *breadth* of a vessel mean her length overall and greatest breadth.

(k) Vessels shall be deemed to be in sight of one another only when one can be observed visually from the other.

(l) The term *restricted visibility* means any condition in which visibility is restricted by fog, mist, falling snow, heavy rainstorms, sandstorms or any other similar causes.

(m) The term *Wing-In-Ground (WIG) craft* means a multimodal craft which, in its main operational mode, flies in close proximity to the surface by utilizing surface-effect action.

(n) The word *mile* means nautical mile (1852 meters).

Amended 31 August 2006.
Part B. Steering and sailing rules

Section I. Conduct of vessels in any condition of visibility

Rule 4

*Application*

Rules in Section I apply to any condition of visibility.

Rule 5

*Look-out*

Any vessel shall at all times maintain a proper look-out by sight and hearing as well as by all available means appropriate in the prevailing circumstances and conditions so as to make a full appraisal of the situation and of the risk of collision.

Rule 6

*Safe speed*

Any vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid collision and be stopped within a distance appropriate to the prevailing circumstances and conditions.

In determining a safe speed the following factors shall be among those taken into account:

(a) By all vessels:
   (i) the state of visibility;
   (ii) the traffic density including concentrations of fishing vessels or any other vessels;
   (iii) the manoeuvrability of the vessel with special reference to stopping distance and turning ability in the prevailing conditions;
   (iv) at night the presence of background light such as from shore lights or from back scatter of her own lights;
   (v) the state of wind, sea and current, and the proximity of navigational hazards;
   (vi) the draught in relation to the available depth of water.

(b) Additionally, by vessels with operational radar:
   (i) the characteristics, efficiency and limitations of the radar equipment;
   (ii) any constraints imposed by the radar range scale in use;
   (iii) the effect on radar detection of the sea state, weather and other sources of interference;
   (iv) the possibility that small vessels, ice and other floating objects may not be detected by radar at an adequate range;
   (v) the number, location and movement of vessel detected by radar;
   (vi) the more exact assessment of the visibility that may be possible when radar is used to determine the range of vessels or other objects in the vicinity.

Rule 7

*Risk of collision*

(a) Any vessel shall use all available means appropriate to the prevailing circumstances and conditions to determine if risk of collision exists. If there is any doubt, such risk shall be deemed to exist.

(b) Proper use shall be made of radar equipment if fitted and operational, including long-range scanning to obtain early warning of risk of collision and radar plotting or equivalent systematic observation of detected objects.

(c) Assumptions shall not be made on the basis of scanty information, especially scanty radar information.

(d) In determining if risk of collision exists, the following considerations shall be among those taken into account:
   (i) such risk shall be deemed to exist if the compass bearing of an approaching vessel does not appreciably change;
   (ii) such risk may sometimes exist even when an appreciable bearing change is evident, particularly when approaching a very large vessel or a tow or when approaching a vessel at close range.
Rule 8

Action to avoid collision

(a) Any action taken to avoid collision shall be taken in accordance with the rules of this Part and, if the circumstances of the case admit, be positive, made in ample time and with due regard to the observance of good seamanship.

(b) Any alteration of course and/or speed to avoid collision shall, if the circumstances of the case admit, be large enough to be readily apparent to another vessel observing visually or by radar. A succession of small alterations of course and/or speed should be avoided.

(c) If there is sufficient sea room, alteration of course alone may be the most effective action to avoid a close-quarters situation provided that it is made in good time, is substantial and does not result in another close-quarters situation.

(d) Action taken to avoid collision with another vessel shall be such as to result in passing at a safe distance. The effectiveness of the action shall be carefully checked until the other vessel is finally past and clear.

(e) If necessary to avoid collision or allow more time to assess the situation, a vessel shall slacken her speed or take all way off by stopping or reversing her means of propulsion.

(f) (i) A vessel which, by any of these Rules, is required not to impede the passage or safe passage of another vessel shall, when required by the circumstances of the case, take early action to allow sufficient sea room for the safe passage of the vessel.

(ii) A vessel required not to impede the passage or safe passage of another vessel is not relieved of this obligation if approaching the other vessel so as to involve risk of collision and shall, when taking action, have full regard to the action which may be required by the rules of this part.

(iii) A vessel the passage of which is not to be impeded remains fully obliged to comply with the rules of this part when the two vessels are approaching one another so as to involve risk of collision.

Amended by regulation of 31 August 2006 No. 1016.

Rule 9

Narrow channels

(a) A vessel proceeding along the course of a narrow channel or fairway shall keep as near to the outer limit of the channel or fairway which lies on her starboard side as is safe and practicable.

(b) A vessel of less than 20 metres in length or a sailing vessel shall not impede the passage of a vessel which can navigate safely only within a narrow channel or fairway.

(c) A vessel engaged in fishing shall not impede the passage of any other vessel navigating within a channel or fairway.

(d) A vessel shall not cross a narrow channel or fairway if such crossing impedes the passage of a vessel which can navigate safely only within such channel or fairway. The latter vessel may use the sound signal prescribed in Rule 34 paragraph (d) if in doubt as to the intention of the crossing vessel.

(e) (i) In a narrow channel or fairway when overtaking can take place only if the vessel to be overtaken has to take action to permit safe passing, the vessel intending to overtake shall indicate her intention by sounding the appropriate signal prescribed in Rule 34 subparagraph (c) (i). The vessel to be overtaken shall, if in agreement, sound an appropriate signal as prescribed in Rule 34 subparagraph (c) (ii) and take steps to permit safe passing. If in doubt she may sound the signals prescribed in Rule 34 paragraph (d).

(ii) This Rule does not relieve the overtaking vessel of her obligation under Rule 13.

(f) A vessel nearing a bend or an area of a narrow channel or fairway where other vessels may be obscured by an intervening obstruction shall navigate with particular alertness and caution and shall sound the appropriate signal prescribed in Rule 34 paragraph (e).

(g) Any vessel shall, if the circumstances of the case admit, avoid anchoring in a narrow channel.

Amended by regulation of 31 August 2006 No. 1016.

Rule 10

Traffic separation schemes

(a) This Rule applies to traffic separation schemes adopted by the Organization and does not relieve any vessel of her obligation under any other Rule.

(b) A vessel using a traffic separation scheme shall:

(i) proceed in the appropriate traffic lane in the general direction of traffic flow for that lane;

(ii) so far as practicable keep clear of a traffic separation line or separation zone;
normally join or leave a traffic lane at the termination of the lane, but when joining or leaving from either side shall do so at as small an angle to the general direction of traffic flow as practicable.

(c) A vessel shall, so far as practicable, avoid crossing traffic lanes, but if obliged to do so shall cross on a heading as nearly as practicable at right angles to the general direction of traffic flow.

(d) (i) A vessel shall not use inshore traffic zones when she can safely use the appropriate traffic lane within the adjacent traffic separation scheme. However, vessels of less than 20 metres in length, sailing vessels and vessels engaged in fishing may use the inshore traffic zone.

(ii) Notwithstanding subparagraph (d) (i), a vessel may use an inshore traffic zone when en route to or from a port, offshore installation or structure, pilot station or any other place situated within the inshore traffic zone, or to avoid immediate danger.

(e) A vessel other than a crossing vessel or a vessel joining or leaving a lane, shall not normally enter a separation zone or cross a separation line except:

(i) in case of emergency to avoid immediate danger;

(ii) to engage in fishing within a separation zone.

(f) A vessel navigating in areas near the terminations of traffic separation schemes shall do so with particular caution.

(g) A vessel shall so far as practicable avoid anchoring in a traffic separation scheme or in areas near its terminations.

(h) A vessel not using a traffic separation scheme shall avoid it by as wide a margin as is practicable.

(i) A vessel engaged in fishing shall not impede the passage of any vessel following a traffic lane.

(j) A vessel of less than 20 metres in length or a sailing vessel shall not impede the safe passage of a power-driven vessel following a traffic lane.

(k) A vessel restricted in her ability to manoeuvre when engaged in an operation for the maintenance of safety of navigation in a traffic separation scheme is exempted from complying with this Rule to the extent necessary to carry out the operation.

(l) A vessel restricted in her ability to manoeuvre when engaged in an operation for the laying, servicing or picking up of a submarine cable, within a traffic separation scheme, is exempted from complying with this Rule to the extent necessary to carry out the operation.

Amended by regulation of 31 August 2006 No. 1016.

1 See footnote 1 to Rule 1.

Section II. Conduct of vessels in sight of one another

Rule 11

Application

Rules in Section II apply to vessels in sight of one another.

Rule 12

Sailing vessels

(a) When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other as follows:

(i) when each has the wind on a different side, the vessel which has the wind on the port side shall keep out of the way of the other;

(ii) when both have the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward;

(iii) if a vessel with the wind on the port side sees a vessel to windward and cannot determine with certainty whether the other vessel has the wind on the port or on the starboard side, she shall keep out of the way of the other.

(b) For the purposes of this Rule the windward side shall be deemed to be the side opposite to that on which the mainsail is carried or, in the case of a square-rigged vessel, the side opposite to that on which the largest fore-and-aft sail is carried.

Rule 13

Overtaking

(a) Notwithstanding anything contained in the Rules of Part B, Sections I and II, any vessel overtaking any other shall keep out of the way of the vessel being overtaken.
(b) A vessel shall be deemed to be overtaking when coming up with another vessel from a direction more than 22.5 degrees abaft her beam, that is, in such a position with reference to the vessel she is overtaking, that at night she would be able to see only the stern light of that vessel but neither of her sidelights.

(c) When a vessel is in any doubt as to whether she is overtaking another, she shall assume that this is the case and act accordingly.

(d) Any subsequent alteration of the bearing between the two vessels shall not make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

Rule 14
Head-on situation

(a) When two power-driven vessels are meeting on reciprocal or nearly reciprocal courses so as to involve risk of collision, each shall alter her course to starboard so that each shall pass on the port side of the other.

(b) Such a situation shall be deemed to exist when a vessel sees the other ahead or nearly ahead and by night she could see the masthead lights of the other in a line or nearly in a line and/or both sidelights and by day she observes the corresponding aspect of the other vessel.

(c) When a vessel is in any doubt as to whether such a situation exists, she shall assume that it does exist and act accordingly.

Rule 15
Crossing situation

When two power-driven vessels are crossing so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way and shall, if the circumstances of the case admit, avoid crossing ahead of the other vessel.

Rule 16
Action by give-way vessel

Every vessel which is directed to keep out of the way of another vessel shall, so far as possible, take early and substantial action to keep well clear.

Rule 17
Action by stand-on vessel

(a) (i) Where one of two vessels is to keep out of the way, the other shall keep her course and speed.

(ii) The latter vessel may however take action to avoid collision by her manoeuvre alone, as soon as it becomes apparent to her that the vessel required to keep out of the way is not taking appropriate action in compliance with these Rules.

(b) When, from any cause, the vessel required to keep her course and speed finds herself so close that collision cannot be avoided by the action of the give-way vessel alone, she shall take such action as will best aid to avoid collision.

(c) A power-driven vessel which takes action in a crossing situation in accordance with subparagraph (a) (ii) of this Rule to avoid collision with another power-driven vessel shall, if the circumstances of the case admit, not alter course to port for a vessel on her own port side.

(d) This Rule does not relieve the give-way vessel of her obligation to keep out of the way.

Rule 18
Responsibilities between vessels

Except where Rules 9, 10 and 13 otherwise require:

(a) A power-driven vessel underway shall keep out of the way of:

(i) a vessel not under command;

(ii) a vessel restricted in her ability to manoeuvre;

(iii) a vessel engaged in fishing;

(iv) a sailing vessel.

(b) A sailing vessel underway shall keep out of the way of:

(i) a vessel not under command;

(ii) a vessel restricted in her ability to manoeuvre;
Section III. Conduct of vessels in restricted visibility

Rule 19
Conduct of vessels in restricted visibility

(a) This Rule applies to vessels not in sight of one another when navigating in or near an area of restricted visibility.
(b) Any vessel shall proceed at a safe speed adapted to the prevailing circumstances and conditions of restricted visibility. A power-driven vessel shall have her engines ready for immediate manoeuvre.
(c) Any vessel shall have due regard to the prevailing circumstances and conditions of restricted visibility when complying with the Rules of Section I of this Part.
(d) A vessel which detects by radar alone the presence of another vessel, shall determine if a close-quarters situation is developing and/or risk of collision exists. If so, she shall take avoiding action in ample time. When such action consists of an alteration of course, so far as possible the following shall be avoided:
   (i) an alteration of course to port for a vessel forward of the beam, other than for a vessel being overtaken;
   (ii) an alteration of course towards a vessel abeam or abaft the beam.
(e) Except where it has been determined that a risk of collision does not exist, any vessel which hears apparently forward of her beam the fog signal of another vessel, or which cannot avoid a close-quarters situation with another vessel forward of her beam, shall reduce her speed to the minimum at which she can be kept on her course. She shall if necessary take all her way off and in any event navigate with extreme caution until danger of collision is over.

Part C. Lights and shapes

Rule 20
Application

(a) Rules in this Part shall be complied with in all weathers.
(b) The Rules concerning lights shall be complied with from sunset to sunrise. During such times no other lights shall be exhibited, except such lights as cannot be mistaken for the lights specified in these Rules and do not impair their visibility or distinctive character, or interfere with the keeping of a proper look-out.
(c) The lights prescribed by these Rules shall, if carried, also be exhibited from sunrise to sunset in restricted visibility and may be exhibited in all other circumstances when it is deemed necessary.
(d) The Rules concerning shapes shall be complied with by day.
(e) The lights and shapes specified in these Rules shall comply with the provisions of Annex I to these Rules.
Rule 21

Definitions

(a) **Masthead light** means a white light placed over the fore and aft centreline of the vessel showing an unbroken light over an arc of the horizon of 225 degrees and so fixed as to show the light from right ahead to 22.5 degrees abaft the beam on either side of the vessel.

(b) **Sidelights** means a green light on the starboard side and a red light on the port side each showing an unbroken light over an arc of the horizon of 112.5 degrees and so fixed as to show the light from right ahead to 22.5 degrees abaft the beam on its respective side. In a vessel of less than 20 metres in length the sidelights may be combined in one lantern carried on the fore and aft centreline of the vessel.

(c) **Stern light** means a white light placed as nearly as practicable at the stern showing an unbroken light over an arc of the horizon of 135 degrees and so fixed as to show the light 67.5 degrees from right aft on each side of the vessel.

(d) **Towing light** means a yellow light having the same characteristics as the «stern light» defined in paragraph (c) of this Rule.

(e) **All round light** means a light showing an unbroken light over an arc of the horizon of 360 degrees.

(f) **Flashing light** means a light flashing at regular intervals at a frequency of 120 flashes or more per minute.

Rule 22

Visibility of lights

The lights prescribed in these Rules shall have an intensity as specified in Section 8 of Annex I to these Rules, so as to be visible at the following minimum ranges:

(a) In vessels of 50 metres or more in length:
   - a masthead light, 6 miles;
   - a sidelight, 3 miles;
   - a stern light, 3 miles;
   - a towing light, 3 miles;
   - a white, red, green or yellow all-round light, 3 miles.

(b) In vessels of 12 metres or more in length, but less than 50 metres in length:
   - a masthead light, 5 miles; except that where the length of the vessel is less than 20 metres, 3 miles;
   - a sidelight, 2 miles;
   - a stern light, 2 miles;
   - a towing light, 2 miles;
   - a white, red, green or yellow all-round light, 2 miles.

(c) In vessels of less than 12 metres in length:
   - a masthead light, 2 miles;
   - a sidelight, 1 mile;
   - a stern light, 2 miles;
   - a towing light, 2 miles;
   - a white, red, green or yellow all-round light, 2 miles.

(d) In inconspicuous, partly submerged vessels or objects being towed:
   - a white all-round light, 3 miles.

Rule 23

Power-driven vessels underway

(a) A power-driven vessel underway shall exhibit:
   (i) a masthead light forward;
   (ii) a second masthead light abaft of and higher than the forward one. A vessel of less than 50 metres in length shall not be obliged to exhibit such light, but may do so;
   (iii) sidelights;
   (iv) a stern light.

(b) An air-cushion vessel when operating in the non-displacement mode shall, in addition to the lights prescribed in paragraph (a) of this Rule, exhibit an all-round flashing yellow light.

(c)
   (i) A power-driven vessel of less than 12 metres in length may in lieu of the lights prescribed in paragraph (a) of this Rule, exhibit an all-round white light and sidelights;
   (ii) a power-driven vessel of less than 7 metres in length whose maximum speed does not exceed 7 knots, may in lieu of the lights prescribed in paragraph (a) of this Rule exhibit an all-round white light and shall, if practicable, also exhibit sidelights;
   (iii) the masthead light or all-round white light in a power-driven vessel of less than 12 metres in length, may be displaced from the fore and aft centreline of the vessel if centreline fitting is not practicable,
provided that the sidelights are combined in one lantern which shall be carried on the fore and aft
centreline of the vessel or located as nearly as practicable in the same fore and aft line as the
masthead light or the all-round white light.

(d) A WIG craft only when taking-off, landing and in flight near the surface shall, in addition to the lights
prescribed in paragraph (a) of this Rule, exhibit a high intensity all-round flashing red light.

Amended by regulation of 31 August 2006 No. 1016.

Rule 24
Towing and pushing

(a) A power-driven vessel when towing shall exhibit:
(i) instead of the light prescribed in Rule 23 subparagraphs (a) (i) or (a) (ii), two masthead lights in a
vertical line. When the length of the tow, measuring from the stern of the towing vessel to the after
end of the tow exceeds 200 metres, three such lights in a vertical line;
(ii) sidelights;
(iii) a stern light;
(iv) a towing light in a vertical line above the stern light;
(v) when the length of the tow exceeds 200 metres, a diamond shape where it can best be seen.

(b) When a pushing vessel and a vessel being pushed ahead are rigidly connected in a composite unit they
shall be regarded as a power-driven vessel and exhibit the lights prescribed in Rule 23.

(c) A power-driven vessel when pushing ahead or towing alongside, except in the case of a composite unit,
shall exhibit:
(i) instead of the light prescribed in Rule 23 subparagraphs (a) (i) or (a) (ii), two masthead lights in a
vertical line;
(ii) sidelights;
(iii) a stern light.

(d) A power-driven vessel to which paragraphs (a) or (c) of this Rule apply, shall also comply with Rule 23
subparagraph (a) (ii).

(e) A vessel or object being towed other than those mentioned in paragraph (g) of this Rule, shall exhibit:
(i) sidelights;
(ii) a stern light;
(iii) when the length of the tow exceeds 200 metres, a diamond shape where it can best be seen.

(f) Several vessels being towed alongside or pushed in a group, shall nevertheless be lighted as one vessel:
(i) a vessel being pushed ahead, not being part of a composite unit, shall exhibit sidelights at the
forward end;
(ii) a vessel being towed alongside, shall exhibit a stern light and sidelights at the forward end.

(g) An inconspicuous, or partly submerged vessel or object, or combination of such vessels or objects being
towed, shall exhibit:
(i) if it is less than 25 metres in breadth, one all-round white light at or near the forward end and one at
or near the after end, except that dracones need not exhibit a light at or near the forward end;
(ii) if it is 25 metres or more in breadth, two additional all-round white lights at or near the extremities of
its breadth;
(iii) if it exceeds 100 metres in length, additional all-round white lights between the lights prescribed in
subparagraphs (i) and (ii), so that the distance between the lights shall not exceed 100 metres;
(iv) a diamond shape at or near the aftermost extremity of the last vessel or object towed, and if the
length of the tow exceeds 200 metres, an additional diamond shape where it can best be seen and
located as far forward as is practicable.

(h) Where from any reason it is impracticable for a vessel or object being towed to exhibit the lights or shapes
prescribed in paragraphs (e) or (g) of this Rule, all possible measures shall be taken to light the vessel or
object towed, or at least to indicate the presence of such a vessel or object.

(i) Where from any reason it is impracticable for a vessel not normally engaged in towing operations to
display the lights prescribed in paragraphs (a) or (c) of this Rule, such a vessel shall not be required to
exhibit those lights when engaged in towing another vessel in distress or otherwise in need of assistance.
All possible measures shall be taken to indicate the nature of the relationship between the towing vessel
and the vessel being towed as authorized by Rule 36, in particular by illuminating the towline.

Rule 26
Fishing vessels

(a) A vessel engaged in fishing, whether underway or at anchor, shall exhibit only the lights and shapes
prescribed in this Rule.
Rule 27

Vessels not under command or restricted in their ability to manoeuvre

(a) A vessel not under command shall exhibit:
(i) two all-round red lights in a vertical line where they can best be seen;
(ii) two balls or similar shapes in a vertical line where they can best be seen;
(iii) when making way through the water, in addition to the lights prescribed in this paragraph, sidelights and a stern light.

(b) A vessel restricted in her ability to manoeuvre, except a vessel engaged in mine clearance operations, shall exhibit:
(i) three all-round lights in a vertical line where they can best be seen. The highest and lowest of these lights shall be red and the middle light shall be white;
(ii) three shapes in a vertical line where they can best be seen. The highest and lowest of these shapes shall be balls and the middle one a diamond;
(iii) when making way through the water, a masthead light or lights, sidelights and a stern light, in addition to the lights prescribed in subparagraph (i);
(iv) when at anchor, in addition to the lights or shapes prescribed in subparagraphs (i) and (ii), the light, lights or shape prescribed in Rule 30.

(c) A power-driven vessel engaged in a towing operation such as severely restricts the towing vessel and her tow in their ability to deviate from their course shall, in addition to the lights or shapes prescribed in Rule 24 paragraph (a), exhibit the lights or shapes prescribed in subparagraphs (b) (i) and (ii) of this Rule.

(d) A vessel engaged in dredging or underwater operations, when restricted in her ability to manoeuvre, shall exhibit the lights and shapes prescribed in subparagraphs (b) (i), (ii) and (iii) of this Rule and shall in addition, when an obstruction exists, exhibit:
(i) two all-round red lights or two balls in a vertical line to indicate the side on which the obstruction exists;
(ii) two all-round green lights or two diamonds in a vertical line to indicate the side on which another vessel may pass;
(iii) when at anchor, the lights or shapes prescribed in this paragraph instead of the lights or shape prescribed in Rule 30.

(e) Whenever the size of a vessel engaged in diving operations makes it impracticable to exhibit all lights and shapes prescribed in paragraph (d) of this Rule, the following shall be exhibited:
(i) three all-round lights in a vertical line where they can best be seen. The highest and lowest of these lights shall be red and the middle light shall be white;
(ii) a rigid replica of the International Code flag «A» not less than 1 metre in height. Measures shall be taken to ensure its all-round visibility.

(f) A vessel engaged in mine clearance operations shall in addition to the lights prescribed for a power-driven vessel in Rule 23, or to the lights or shape prescribed for a vessel at anchor in rule 30 as appropriate, exhibit three all-round green lights or three balls. One of these lights or shapes shall be exhibited near the foremast head and one at each end of the foreyard. These lights or shapes indicate that it is dangerous for another vessel to approach within 1,000 metres of the mine clearance vessel.
(g) Vessels of less than 12 metres in length, except those engaged in diving operations, shall not be required to exhibit the lights and shapes prescribed in this Rule.

(h) The signals prescribed in this Rule are not signals of vessels in distress and requiring assistance. Such signals are contained in Annex IV to these Rules.

**Rule 28**

*Vessels constrained by their draught*

A vessel constrained by her draught may, in addition to the lights prescribed for power-driven vessels in Rule 23, exhibit where they can best be seen three all-round red lights in a vertical line, or a cylinder.

**Rule 29**

*Pilot vessels*

(a) A vessel engaged on pilotage duty shall exhibit:

(i) at or near the masthead, two all-round lights in a vertical line, the upper being white and the lower red;

(ii) when underway, in addition, sidelights and a stern light;

(iii) when at anchor, in addition to the lights prescribed in subparagraph (i), the light, lights or shape prescribed in Rule 30 for vessels at anchor.

(b) A pilot vessel when not engaged on pilotage duty shall exhibit the lights or shapes prescribed for a similar vessel of her length.

**Rule 30**

*Anchored vessels and vessels aground*

(a) A vessel at anchor shall exhibit where it can best be seen:

(i) in the fore part, an all-round white light or one ball;

(ii) at or near the stern and at a lower level than the light prescribed in subparagraph (i), an all-round white light.

(b) A vessel of less than 50 metres in length may exhibit an all-round white light where it can best be seen instead of the lights prescribed in paragraph (a) of this Rule.

(c) A vessel at anchor may, and a vessel of 100 metres and more in length, shall also use the available working or equivalent lights to illuminate her decks.

(d) A vessel aground shall exhibit the lights prescribed in paragraphs (a) or (b) of this Rule and in addition, where they can best be seen:

(i) two all-round red lights in a vertical line;

(ii) three balls in a vertical line.

(e) A vessel of less than 7 metres in length, when at anchor, not in or near a narrow channel, fairway or anchorage, or where other vessels normally navigate, shall not be required to exhibit the lights or shape prescribed in paragraphs (a) and (b) of this Rule.

(f) A vessel of less than 12 metres in length, when aground, shall not be required to exhibit the lights or shapes prescribed in subparagraphs (d) (i) and (ii) of this Rule.

**Rule 31**

*Seaplanes*

Where it is impracticable for a seaplane or a WIG craft to exhibit lights and shapes of the characteristics or in the positions prescribed in the Rules of this Part, she shall exhibit lights and shapes as closely similar in characteristics and position as is possible.

Amended by regulation of 31 August 2006 No. 1016.

**Part D. Sound and light signals**

**Rule 32**

*Definitions*

(a) The word *whistle* means any sound signalling appliance capable of producing the prescribed blasts and which complies with the specifications in Annex III to these Rules.
(b) The term short blast means a blast of about one second’s duration.
(c) The term prolonged blast means a blast of from four to six seconds’ duration.

Rule 33

Equipment for sound signals

(a) A vessel of 12 metres or more in length shall be provided with a whistle, a vessel of 20 metres or more in length shall be provided with a bell in addition to a whistle, and vessel of 100 metres or more in length shall, in addition, be provided with a gong, the tone and sound of which cannot be confused with that of the bell. The whistle, bell and gong shall comply with the specifications in Annex III to these Rules. The bell or gong or both may be replaced by other equipment having the same respective sound characteristics, provided that manual sounding of the prescribed signals shall always be possible.

(b) A vessel of less than 12 metres in length shall not be obliged to carry the sound signalling appliances prescribed in paragraph (a) of this Rule, but if she does not, she shall be provided with some other means of making an efficient sound signal.

Amended by regulation of 31 August 2006 No. 1016.

Rule 34

Manoeuvring and warning signals

(a) When vessels are in sight of one another, a power-driven vessel underway, when manoeuvring as authorized or required by these Rules, shall indicate that manoeuvre by the following signals on her whistle:
– one short blast to mean «I am altering my course to starboard»;
– two short blasts to mean «I am altering my course to port»;
– three short blasts to mean «I am operating astern propulsion».

(b) Any vessel may supplement the whistle signals prescribed in paragraph (a) of this Rule by light signals, repeated as appropriate, whilst the manoeuvre is being carried out:
(i) these light signals shall have the following significance:
  – one flash to mean: «I am altering my course to starboard»;
  – two flashes to mean: «I am altering my course to port»;
  – three flashes to mean: «I am operating astern propulsion»;
(ii) the duration of each flash shall be about one second, the interval between flashes shall be about one second, and the interval between the signals shall be not less than ten seconds;
(iii) the light used for this signal shall, if fitted, be an all-round white light, visible at a minimum range of 5 miles, and shall comply with the provisions of Annex I to these Rules.

(c) When in sight of one another in a narrow channel or fairway:
(i) a vessel intending to overtake another shall in compliance with Rule 9 subparagraph (e) (i) indicate her intention by the following signals on her whistle:
   – two prolonged blasts followed by one short blast to mean «I intend to overtake you on your starboard side»;
   – two prolonged blasts followed by two short blasts to mean «I intend to overtake you on your port side».
(ii) the vessel about to be overtaken when acting in accordance with Rule 9 subparagraph (e) (i) shall indicate her agreement by the following signal on her whistle:— one prolonged, one short, one prolonged and one short blast, in that order.

(d) When two vessels in sight of one another are approaching each other and from any cause either vessel fails to understand the intentions or actions of the other, or is in doubt whether sufficient action is being taken by the other to avoid collision, the vessel in doubt shall immediately indicate such doubt by giving at least five short and rapid blasts on the whistle. Such signal may be supplemented by a light signal of at least five short and rapid flashes.

(e) A vessel nearing a bend or an area of a channel or fairway where other vessels may be obscured by an intervening obstruction, shall sound one prolonged blast. Such signal shall be answered with a prolonged blast by any approaching vessel that may be within hearing around the bend or behind the intervening obstruction.

(f) If whistles are fitted on a vessel at a distance apart of more than 100 metres, one whistle only shall be used for giving manoeuvring and warning signals.

Rule 35

Sound signals in restricted visibility

In or near an area of restricted visibility, whether by day or night, the signals prescribed in this Rule shall be used as follows:
(a) A power-driven vessel making way through the water shall sound at intervals of not more than 2 minutes one prolonged blast.

(b) A power-driven vessel underway but stopped and making no way through the water, shall sound at intervals of not more than 2 minutes two prolonged blasts in succession with an interval of about 2 seconds between them.

(c) A vessel not under command, a vessel restricted in her ability to manoeuvre, a vessel constrained by her draught, a sailing vessel, a vessel engaged in fishing and a vessel engaged in towing or pushing another vessel shall, instead of the signals prescribed in paragraphs (a) or (b) of this Rule, sound at intervals of not more than 2 minutes three blasts in succession, namely one prolonged followed by two short blasts.

(d) A vessel engaged in fishing, when at anchor, and a vessel restricted in her ability to manoeuvre when carrying out her work at anchor, shall instead of the signals prescribed in paragraph (g) of this Rule sound the signal prescribed in paragraph (c) of this Rule.

(e) A vessel towed or if more than one vessel is towed, the last vessel of the tow, if manned, shall at intervals of not more than 2 minutes sound four blasts in succession, namely one prolonged followed by three short blasts. When practicable, this signal shall be made immediately after the signal made by the towing vessel.

(f) When a pushing vessel and a vessel being pushed ahead are rigidly connected as a composite unit, they shall be regarded as a power-driven vessel and shall give the signals prescribed in paragraphs (a) or (b) of this Rule.

(g) A vessel at anchor shall at intervals of not more than one minute ring the bell rapidly for about 5 seconds. In a vessel of 100 metres or more in length, the bell shall be sounded in the forepart of the vessel, and immediately after the ringing of the bell, the gong shall be sounded rapidly for about 5 seconds in the after part of the vessel. A vessel at anchor may in addition sound three blasts in succession, namely one short, one prolonged and one short blast, to give warning of her position and of the possibility of collision to an approaching vessel.

(h) A vessel aground shall give the bell signal and, if required, the gong signal prescribed in paragraph (g) of this Rule and shall, in addition give three separate and distinct strokes on the bell immediately before and after the rapid ringing of the bell. A vessel aground may in addition sound an appropriate whistle signal.

(i) A vessel of 12 metres or more, but less than 20 metres in length shall not be obliged to give the bell signals prescribed in paragraphs (g) and (h) of this Rule. However, if she does not, she shall make some other efficient sound signal at intervals of not more than 2 minutes.

(j) A vessel of less than 12 metres in length shall not be obliged to give the above-mentioned signals but, if she does not, shall make some other efficient sound signal at intervals of not more than 2 minutes.

(k) A pilot vessel when engaged on pilotage duty, may in addition to the signals prescribed in paragraphs (a), (b) or (g) of this Rule sound an identity signal consisting of four short blasts.

Amended by regulation of 31 August 2006.

Rule 36
Signals to attract attention

If necessary to attract the attention of another vessel, any vessel may make light or sound signals that cannot be mistaken for any signal authorized elsewhere in the Rules, or may direct the beam of her searchlight in the direction of the danger, in such a way as not to embarrass any vessel. Any light to attract the attention of another vessel shall be such that it cannot be mistaken for any aid to navigation. For the purpose of this Rule, the use of high intensity intermittent or revolving lights, such as strobe lights, shall be avoided.

Rule 37
Distress signals

When a vessel is in distress and requires assistance, she shall use or exhibit the signals described in Annex IV to these Rules.

Part E. Exemptions

Rule 38
Exemptions

Any vessel (or class of vessels), provided that she complies with the requirements of the International Regulations for Preventing Collisions at Sea, 1960, the keel of which is laid or which is at a corresponding stage of construction before the entry into force of these Rules, may be exempted from compliance therewith as follows:
(a) The installation of lights with ranges prescribed in Rule 22, until four years after the date of entry into force of these Rules.
(b) The installation of light with colour specifications as prescribed in Section 7 of Annex I to these Rules, until four years after the date of entry into force of these Rules.
(c) The repositioning of lights as a result of conversion from Imperial to metric units and rounding off measurement figures, permanent exemption.
(d) 
  (i) The repositioning of masthead lights on vessels of less than 150 metres or more in length, resulting from the prescriptions of Section 3 paragraph (a) of Annex I to these Rules, permanent exemption.
  (ii) The repositioning of masthead lights on vessels of 150 metres or more in length, resulting from the prescriptions of Section 3 paragraph (a) of Annex I to these Rules, until nine years after the date of entry into force of these Rules.
(e) The repositioning of masthead lights resulting from the prescriptions of Section 2 paragraph (b) of Annex I to these Rules, until nine years after the date of entry into force of these Rules.
(f) The repositioning of sidelights resulting from the prescriptions of Section 2 paragraph (g) and Section 3 paragraph (b) of Annex I to these Rules, until nine years after the date of entry into force of these Rules.
(g) The repositioning for sound signal appliances prescribed in Annex III to these Rules, until nine years after the date of entry into force of these Rules.
(h) The repositioning of all-round lights resulting from the prescription of Section 9 paragraph (b) of Annex I to these Rules, permanent exemption.

Chapter II
Special rules for Norwegian inland waters

Part A. General rules

Rule 39
Application
(a) The International Rules for Preventing Collisions at Sea shall also apply in Norwegian inland waters, including in Svalbard and Jan Mayen, where nothing else appears from the rules of this Chapter.
(b) The rules of this Chapter shall also apply to foreign vessels.
(c) The term Norwegian inland waters means harbours, rivers, canals, lakes and all waters lying within the outer boundary specifically stipulated in the Pilotage Act. Norwegian inland waters include waters under Norwegian Jurisdiction at Svalbard and Jan Mayen.

Rule 40
Specific rules inside and outside harbour areas
(a) Specific rules for a harbour area may be issued by the Norwegian Maritime Directorate on recommendation by the appropriate authority.
(b) For inland waters outside harbour districts where special conditions prevail, specific rules may be issued by the Norwegian Maritime Directorate on recommendation by the appropriate authority.

Part B. Steering and sailing rules

Rule 41
Narrow channels and fairways
(a) A power-driven vessel shall always give warning of its arrival in a narrow channel from a distance of about half a mile by sounding a long blast of at least 10 seconds’ duration.
(b) Where two power-driven vessels on reciprocal course approach a fairway being so narrow as not to allow passing without risk of collision, the vessel arriving last shall wait for the other one to pass, provided this vessel has sounded a signal as prescribed in paragraph (a) of this rule.
(c) A power-driven vessel in a channel which is too narrow to allow a meeting vessel to pass without risk of collision, shall indicate this to a meeting vessel by giving at least 5 short blasts on the whistle. The meeting vessel shall then wait until the other one has passed.
Rule 42  
*Passing vessels engaged in diving operations*  
Whenever a vessel indicates by the international code flag «A» or a rigid replica marked in similar manner («I have a diver down. Keep well clear at slow speed»), that a diver or frogman is engaged in diving operations, other vessels shall pass with caution, and power-driven vessels shall if possible stop the engine.

Rule 43  
*Small vessels*  
A vessel under oars, a power-driven vessel and a sailing vessel which according to Rule 23 paragraph (c) or 25 paragraph (d) only carries or exhibits a white light shall, when approaching other vessels or observing other vessels approaching, manoeuvre with caution, slacken the speed and, if required, stop. Such vessels shall keep well out of the way of other vessels.

Rule 44  
*Responsibilities between vessels*  
Pleasure craft and open boats being under oars, sails or engine, shall as far as practicable keep out of the way of larger vessels, scheduled ferries and other commercial traffic when passing narrow waters, a heavily trafficked fairway or a harbour area.

Rule 45  
*Anchoring*  
Vessels or other floating objects shall not, unless absolutely necessary, anchor or make fast so as to impede the passage of, or cause damage to, other vessels.

**Part C. Lights, shapes and sound signals**

Rule 46  
*Lights on small vessels*  
(a) A power-driven vessel of less than 20 metres in length having no mast, may exhibit the light prescribed in Rule 23 subparagraph (a) (i), cf. Section 2 paragraph (c) of Annex I to these Rules, at a height of less than 2.5 metres above the gunwale, but not less than 1 metre above the side lights or the side lights, if in a combined lantern.  
(b) However, a vessel of less than 12 metres in length may exhibit the said light at a lower height where conditions so require but not less than 0.5 metres above the side lights or the side lights, if in a combined lantern.

Rule 47  
*Marking of objects other than vessels*  
(a) Dracones, herring- and fish locknets, etc., lying wholly or partly underwater and under tow, shall have a raft or a float in tow. To mark the after end of the tow, the raft or the float shall exhibit an all-round white light or a diamond shape.  
(b) Power cables and similar constructions being kept floating by means of floats, etc., and which while being extended across waters may result in blocking or restriction of the general traffic, shall be marked as prescribed in Rule 24 paragraph (g). The floats, etc. shall be light-reflective.

Rule 48  
*Special signals for tankers*  
Tankers of 40,000 tons deadweight and more underway to and from Slagentangen, Risavika and Mongstad and tankers of 10,000 tons deadweight and more underway within Filtvet lighthouse to and from oil installations in the inner Oslofjord, shall carry signals as prescribed in Rule 28.
Rule 49

Signals for guard vessels

A vessel engaged in guard duties in connection with temporary blocking or restriction of waters shall patrol at a safe distance from the danger area and shall, in addition to the light or shapes prescribed in the international rules, exhibit three all-round lights in a vertical line where they can best be seen. The highest of these lights shall be green and the two lower ones shall be red. By day such vessel shall exhibit the international code flag «U» at the masthead or from the highest point of the vessel. The flag shall measure at least 1.67 by 1.37 metres.

As a general signal to attract attention, the international single letter signal «U» («You are running into danger») may be given by sound or shown by light.

Rule 50

Proceeding stern first

A power-driven vessel which, apart from short manoeuvres proceeds with the stern first, and being so constructed as to maintain complete manoeuvrability while doing so, shall either exhibit lights as prescribed in the international rules so that they at any time show the actual direction of sailing or two balls positioned symmetrically at each side of the centre line of the vessel, not less than 2 metres above the funnel or superstructure and spaced not less than 3 metres apart.

Rule 51

Signals for cable ferries

A ferry which by the aid of cable, chain or the like moves in a fixed track shall, where they can best be seen and positioned in or parallel to the centre line of the ferry exhibit:

(a) a ball,
(b) three all-round red lights positioned in a vertical equilateral triangle apex upwards and having sides of not less than 1 metre. The lights shall be visible at a distance of not less than 1 mile.

Such ferries shall not exhibit other lights.

Rule 52

Special vessels

When on patrol duty, the vessels of customs authorities and police may in lieu of the lights prescribed in the collision regulations exhibit their lights or a flare when approaching other vessels or when other vessels are approaching. This shall be done in sufficient time to prevent collision.

Rule 53¹

Sound signals of vessels engaged in dredging or underwater operations

A vessel exhibiting lights or shapes as prescribed in Rule 27 paragraph (d), and which is anchored or made fast in such a way as to impede the general traffic, shall in restricted visibility sound the international signal prescribed for vessels at anchor, followed by not less than 6 single strokes of the bell when other traffic shall pass the vessel as if it were a red spar buoy, and no less than 6 double strokes of the bell when other traffic shall pass the vessel as if it were a green spar buoy.

¹ Amended 15 February 1982 with effect from 1 March 1982.

Part D. Special rules for submarines, seaplanes and warships, etc.

Added by regulation 25 April 2002 No. 474 (in force 1 July 2002)

Rule 53a

Completely submerged submarines or submarines showing only their periscopes, shall in Norwegian waters give right of way to all surface vessels and seaplanes on the water.

Surface vessels shall, however, keep a sharp look-out and proceed with caution.

Completely or partly surfaced submarines shall be considered power-driven vessels, and shall comply with the provisions for power-driven vessels in this Regulation.
When submerged submarines are manoeuvring along with surface vessels, they shall exhibit the warning signal that is currently indicated by the International Code of Signals for this situation.

Added by regulation 25 April 2002 No. 474 (in force 1 July 2002)

**Rule 53b**

Surfaced submarines shall in addition to the prescribed positioning lights, exhibit a revolving light as a signal of attention to alert oncoming traffic to the fact that submarines are larger by far than what would be indicated by the reciprocal spacing of onboard lights.

This light shall be positioned 2 metres in a vertical line above the masthead light, and shall exhibit an amber flashlight, flashing at regular intervals at a frequency of approximately 90 flashes per minute, unbroken over an arc of the horizon of 360 degrees. This light shall be visible from a distance of at least 5 miles.

Added by regulation 25 April 2002 No. 474 (in force 1 July 2002)

**Rule 53c**

Norwegian warships and other military vessels are exempted from exhibiting the white light referred to in Rule 23 subparagraph (a) (ii), when they, due to their particular construction or their particular purpose, would be prevented from performing their military functions.

Added by regulation 25 April 2002 No. 474 (in force 1 July 2002)

**Rule 53d**

Norwegian vessels of *Det sjømilitære fiskerioppsett* (The Naval Fisheries Protection Service) shall, in addition to the prescribed positioning lights, during guard duties exhibit a blue light as identification. This light shall be positioned at the highest masthead, and it shall be designed to exhibit an unbroken blue light over an arc of the horizon of 360 degrees. This light shall be visible from a distance of at least 2 miles.

Added by regulation 25 April 2002 No. 474 (in force 1 July 2002)

**Chapter III**

**Common rules**

**Rule 54**

The regulations shall be kept on board

Every master of a decked Norwegian vessel is obliged to keep at least one copy of the collision regulations on board.

**Rule 55**

**Entry into force**

These collision regulations shall enter into force on a date determined by the Norwegian Maritime Directorate.¹

To be repealed as of the same date: «Regulations to Prevent Collisions at Sea (The International Collision Regulations) and Special Collision Regulations for Norwegian Inland Waters», issued by the Norwegian Maritime Directorate on 3 March 1965 with later amendments and «Regulations on Supplementary Signals for Fishing Vessels» issued by the Norwegian Maritime Directorate on 26 September 1969 with later amendments.

Rules issued or approved under Section 2 of the Special Collision Regulations for Norwegian Inland Waters of 3 March 1965 shall remain in force until they are repealed or amended.

These Regulations shall enter into force for foreign ships at Svalbard and Jan Mayen from the date decided by the King.

¹ Entry into force 15 July 1977.

**ANNEX I**

**Positioning and technical details of lights and shapes**

1. **Definition**
The term "height above the hull" means height above the uppermost continuous deck. This height shall be measured from the position vertically beneath the location of the light.

2. **Vertical positioning and spacing of lights**

(a) On a power-driven vessel of 20 metres or more in length the masthead lights shall be placed as follows:

(i) the forward masthead lights, or if only one masthead light is carried, then that light, at a height above the hull of not less than 6 metres, and, if the breadth of the vessel exceeds 6 metres then at a height above the hull not less than such breadth, so, however, that the light need not be placed at a greater height above the hull than 12 metres;

(ii) when two masthead lights are carried the after one shall be at least 4.5 metres vertically higher than the forward one.

(b) The vertical separation of masthead lights of power-driven vessels shall be such that in all normal conditions of trim, the after light will be seen over and separate from the forward light at a distance of 1,000 metres from the stem when viewed from sea level.

(c) The masthead light of a power-driven vessel of 12 metres but less than 20 metres in length shall be placed at a height above the gunwale of not less than 4.5 metres.

(d) A power-driven vessel of less than 12 metres in length may carry the uppermost light at a height of less than 2.5 metres above the gunwale. When however a masthead light is carried in addition to sidelights and a stern light or the all-round light prescribed in Rule 23 subparagraph (c) (i) is carried in addition to sidelights, then such masthead light or all-round lights shall be carried at least 1 metre higher than the sidelights.

(e) One of the two or three masthead lights prescribed for a power-driven vessel when engaged in towing or pushing another vessel, shall be placed in the same position as either the forward masthead light or the after masthead that, if carried on the after-mast, the lowest after masthead light shall be at least 4.5 metres vertically higher than the forward masthead light.

(f) (i) The masthead light or lights prescribed in Rule 23 paragraph (a) shall be so placed as to be above and clear of all other lights and obstructions except as described in subparagraph (ii).

(ii) When it is impracticable to carry the all-round lights prescribed by Rule 27 subparagraph (b) (i) or Rule 28 below the masthead lights, they may be carried above the after masthead light(s) or vertically in between the forward masthead light(s) and after masthead light(s), provided that in the latter case the requirements of Section 3 paragraph (c) of this Annex shall be complied with.

(g) The sidelights of a power-driven vessel shall be placed at a height above the hull not greater than three-quarters of that of the forward masthead light. They shall not be so low as to be obscured by deck lights.

(h) The sidelights, if in a combined lantern and carried on a power-driven vessel of less than 20 metres in length, shall be placed not less than 1 metre below the masthead light.

(i) When the rules prescribe two or three lights to be carried in a vertical line, they shall be spaced as follows:

(i) on a vessel of 20 metres in length or more, such lights shall be spaced not less than 2 metres apart, and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 4 metres above the hull;

(ii) on a vessel of less than 20 metres in length, such lights shall be spaced not less than 1 metre apart and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 2 metres above the gunwale;

(iii) when three lights are carried they shall be equally spaced.

(j) The lower of the two all-round lights prescribed for a vessel engaged in fishing, shall be carried at a height above the sidelights not less than twice the distance between the two vertical lights.

(k) The forward anchor light prescribed in Rule 30 subparagraph (a) (i), when two are carried, shall not be less than 4.5 metres above the after one. On a vessel of 50 metres or more in length, this forward anchor light shall be placed at a height of not less than 6 metres above the hull.

3. **Horizontal positioning and spacing of lights**

(a) When two masthead lights are prescribed for a power-driven vessel, the horizontal distance between them shall not be less than one half of the length of the vessel but need not be more than 100 metres. The forward light shall be placed not more than one quarter of the length of the vessel from the stem.

(b) On a power-driven vessel of 20 metres or more in length, the sidelights shall not be placed in front of the forward masthead lights. They shall be placed at or near the side of the vessel.

(c) When the lights prescribed in Rule 27 subparagraph (b) (i) or Rule 28 are placed vertically between the forward masthead light(s) and the after masthead light(s), these all-round lights shall be placed at a horizontal distance of not less than 2 metres from the fore and after centreline of the vessel in the athwartship direction.

(d) When only one masthead light is prescribed for a power-driven vessel, this light shall be exhibited forward of amidships; except that a vessel of less than 20 metres in length need not exhibit this light forward of amidships but shall exhibit it as far forward as is practicable.

4. **Details of location of direction-indicating lights for fishing vessels, dredgers and vessels engaged in underwater operations**

(a) The light indicating the direction of the outlying gear from a vessel engaged in fishing as prescribed in Rule 26 subparagraph (c) (ii) shall be placed at a horizontal distance of not less than 2 metres and not more than 6
metres away from the two all-round red and white lights. This light shall be placed not higher than the all-round white light prescribed in Rule 26 subparagraph (c) (i) and not lower than the sidelights.

(b) The lights and shapes on a vessel engaged in dredging or underwater operations that indicate the obstructed side and/or the side on which it is safe to pass, as prescribed in Rule 27 subparagraphs (d) (i) and (ii), shall be placed at the maximum practical horizontal distance, but in no case less than 2 metres, from the lights or shapes prescribed in Rule 27 subparagraphs (b) (i) and (ii). In no case shall the upper of these lights or shapes be at a greater height than the lower of the three lights or shapes prescribed in Rule 27 subparagraphs (b) (i) and (ii).

5. **Screens for sidelights**
   The sidelights of vessels of 20 metres or more in length, shall be fitted with inboard screens painted matt black, and meeting the requirements of Section 9 of this Annex. On vessels of less than 20 metres in length, the sidelights, if necessary to meet the requirements of Section 9 of this Annex, shall be fitted with inboard matt black screens. With a combined lantern, using a single vertical filament and a very narrow division between the green and red sections, external screens need not be fitted.

6. **Shapes**
   (a) Shapes shall be black and of the following sizes:
   (i) a ball shall have a diameter of not less than 0.6 metre;
   (ii) a cone shall have a base diameter of not less than 0.6 metre and a height equal to its diameter;
   (iii) a cylinder shall have a diameter of at least 0.6 metre and a height of twice its diameter;
   (iv) a diamond shape shall consist of two cones as defined in (ii) above having a common base.
   (b) The vertical distance between shapes shall be at least 1.5 metre.
   (c) In a vessel of less than 20 metres in length, shapes of lesser dimensions, but commensurate with the size of the vessel, may be used and the distance apart may be correspondingly reduced.

7. **Colour specifications of lights**
   The chromaticity of all navigation lights shall conform to the following standards, which lie within the boundaries of the area of the diagram specified for each colour by the International Commission on Illumination (CIE). The boundaries of the area for each colour are given by indicating the corner co-ordinates, which are as follows:
   (i) White
      \[ \begin{align*}
      x &= 0.525, 0.525, 0.452, 0.310, 0.310, 0.443 \\
      y &= 0.382, 0.440, 0.440, 0.348, 0.283, 0.382
      \end{align*} \]
   (ii) Green
      \[ \begin{align*}
      x &= 0.028, 0.009, 0.300, 0.203 \\
      y &= 0.385, 0.723, 0.511, 0.356
      \end{align*} \]
   (iii) Red
      \[ \begin{align*}
      x &= 0.680, 0.660, 0.735, 0.721 \\
      y &= 0.320, 0.320, 0.265, 0.259
      \end{align*} \]
   (iv) Yellow
      \[ \begin{align*}
      x &= 0.612, 0.618, 0.575, 0.575 \\
      y &= 0.382, 0.382, 0.425, 0.406
      \end{align*} \]

8. **Intensity of lights**
   (a) The minimum luminous intensity of lights shall be calculated by using the formula:
   \[ I = 3.43 \times 10^6 \times T \times D^2 \times K^{10} \]
      where
   \[ I \] is luminous intensity in candelas under service conditions,
   \[ T \] is threshold factor \( 2 \times 10^{-7} \) lux,
   \[ D \] is the prescribed range of visibility (luminous range) of the light in nautical miles,
   \[ K \] is atmospheric transmissivity.
      For prescribed lights the value of \( K \) shall be 0.8, corresponding to a meteorological visibility of approximately 13 nautical miles.
   (b) A selection of figures derived from the formula is given in the following table:

<table>
<thead>
<tr>
<th>Prescribed range of visibility in nautical miles</th>
<th>Luminous intensity (luminous range) in candelas for K=0.8</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>
NOTE: The maximum luminous intensity of navigation lights should be limited, to avoid undue glare. This shall not be achieved by a variable control of the luminous intensity.

9. **Horizontal sectors**
   (a) (i) In the forward direction, sidelights as fitted on the vessel shall show the minimum required intensities. The intensities must decrease to reach practical cutoff between 1 degree and 3 degrees outside the prescribed sectors.
   (ii) For stern lights and masthead lights and at 22.5 degrees abaft the beam for sidelights, the minimum required intensities shall be maintained over the arc of the horizon up to 5 degrees within the limits of the sectors prescribed in Rule 21. From 5 degrees within the prescribed sectors, the intensity may decrease by 50% up to the prescribed limits. It shall decrease steadily to reach practical cut off at not more than 5 degrees outside the prescribed sectors.
   (b) (i) All-round lights shall be so located as not to be obscured by masts, topmasts or structures within angular sectors of more than 6 degrees, except anchor lights prescribed in Rule 30, which need not be placed at an impracticable height above the hull.
   (ii) If it is impracticable to comply with subparagraph (b) (i) of this Section by exhibiting only one all-around light, two all-around lights shall be used suitably positioned or screened so that they appear, as far as practicable, as one light at a distance of a mile.

10. **Vertical sectors**
   (a) The vertical sectors of electric lights as fitted, with the exception of lights on sailing vessels underway shall ensure that:
       (i) at least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;
       (ii) at least 60% of the required minimum intensity is maintained from 7.5 degrees above to 7.5 degrees below the horizontal.
   (b) In the case of sailing vessels underway the vertical sectors of electric lights as fitted shall ensure that:
       (i) at least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;
       (ii) at least 50% of the required minimum intensity is maintained from 25 degrees above to 25 degrees below the horizontal.
   (c) In the case of lights other than electric, these specifications shall be met as closely as possible.

11. **Intensity of non-electric lights**
    Non-electric lights shall so far as practicable comply with the minimum intensities, as specified in the table given in Section 8 of this Annex.

12. **Manoeuvring light**
    Notwithstanding the provisions of Section 2 paragraph (f) of this Annex, the manoeuvring light described in Rule 34 paragraph (b) shall be placed in the same fore and aft vertical plane as the masthead light or lights and, where practicable at a minimum height of 2 metres vertically above the forward masthead light, provided that it shall be carried not less than 2 metres vertically above or below the after masthead light. On a vessel where only one masthead light is carried the manoeuvring light, if fitted, shall be carried where it can best be seen, not less than 2 metres vertically apart from the masthead light.

13. **High speed craft**
   (a) The masthead light of high speed craft may be placed at a height related to the breadth of the craft lower than that prescribed in Section 2 subparagraph (a) (i) of this Annex, provided that the base angle of the isosceles triangles formed by sidelights and masthead light, when seen in end elevation, is not less than 27 degrees.
   (b) On high-speed craft of 50 metres or more in length, the vertical separation between foremast and mainmast light of 4.5 metres required by Section 2 subparagraph (a) (ii) of this Annex, may be modified provided that such distance shall not be less than the value determined by the following formula:

\[
Y = \frac{(a + 1.7\Psi C)}{1000} + 2
\]

where:
- \(y\) is the height of the mainmast light above the foremast light in metres;
- \(a\) is the height of the foremast light above the water surface in service condition in metres;
- \(\Psi\) is the trim in service condition in degrees;
- \(C\) is the horizontal separation of masthead lights in metres

---

14. **Approval**
    The construction of lights and shapes and the installation of lanterns on board the vessel, shall satisfy the requirements set out by the Norwegian Maritime Directorate. Equipment covered by the regulations of 29
December 1998 No. 1455 concerning marine equipment, shall be type-approved by a Notified Body and marked in accordance with the said regulations.

ANNEX II

Additional signals for fishing vessels fishing in close proximity to other vessels engaged in fishing

1. General

The lights mentioned below shall, if exhibited in pursuance of Rule 26 paragraph (d), be placed where they can best be seen. They shall be at least 0.9 metre apart but at a lower level than lights prescribed in Rule 26 subparagraphs (b) (i) and (c) (i). The lights shall be visible all round the horizon at a distance of at least 1 mile but at a lesser distance than the lights prescribed by these Rules for fishing vessels.

Vessels engaged in fishing inside the Norwegian fishing limit, shall exhibit the additional lights prescribed in this Annex. The additional lights shall be exhibited also when the vessel is not fishing in close proximity to other vessels engaged in fishing.

2. Signals for trawlers

(a) Vessels engaged in trawling, whether using demersal or pelagic gear, shall exhibit:
   (i) when shooting their nets: two white lights in a vertical line;
   (ii) when hauling their nets: one white light over one red light in a vertical line;
   (iii) when the net has caught on an obstruction: two red lights in a vertical line;

(b) Any vessel engaged in pair trawling, shall exhibit:
   (i) by night, a searchlight directed forward and in the direction of the other vessel of the pair;
   (ii) when shooting or hauling their nets or when their nets have caught on an obstruction, the lights prescribed in paragraph (a) above.

3. Signals for purse seiners

Vessels engaged in fishing with purse seine gear, shall exhibit two yellow lights in a vertical line. These lights shall flash alternately every second and with equal light and occultation duration. These lights shall be exhibited only when the vessel is hampered by its fishing gear.

Amended by regulations of 24 October 1994 No. 976, 15 May 2001 No. 539.

ANNEX III

Technical details of sound signal appliances

1. Whistles

   (a) Frequencies and range of audibility.

       The fundamental frequency of the signal shall lie within the range 70-700 Hz. The range of audibility of the signal from a whistle shall be determined by those frequencies, which may include the fundamental and/or one or more higher frequencies, which lie within the range 180-700 Hz (+/- 1%) for a vessel of 20 metres or more in length, or 180-2100 Hz (+/- 1%) for a vessel of less than 20 metres in length and which provide the sound pressure levels specified in paragraph (c) below.

   (b) Limits of fundamental frequencies.

       To ensure a wide variety of whistle characteristics, the fundamental frequency of a whistle shall be between the following limits:
       (i) 70-200 Hz, for a vessel of 200 metres or more in length;
       (ii) 130-350 Hz, for a vessel of 75 metres but less than 200 metres in length;
       (iii) 250-700 Hz, for a vessel of less than 75 metres in length.

   (c) Sound signal intensity and range of audibility.

       A whistle fitted in a vessel shall provide, in the direction of maximum intensity of the whistle and at a distance of 1 metre from it, a sound pressure level in at least one 1/3rd octave band within the range of frequencies 180-700 Hz (+/- 1%) for a vessel of 20 metres or more in length, or 180-2100 Hz (+/- 1%) for a vessel of less than 20 metres in length, of not less than the appropriate figure given in the table below:

<table>
<thead>
<tr>
<th>Length of vessel in metres</th>
<th>1/3rd octave band level at 1 metre in dB referred to 2 X 10^-5 N/m²</th>
<th>Audibility range in nautical miles</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
The range of audibility in the table above is for information, and is approximately the range at which a whistle may be heard on its forward axis with 90% probability in conditions of still air on board a vessel having an average background noise level at the listening posts. (Taken to be 68 dB in the octave band centred on 250 Hz and 63 dB in the octave band centred on 500 Hz).

In practice, the range at which a whistle may be heard is extremely variable and depends critically on weather conditions. The values given can be regarded as typical, but under conditions of strong wind or high ambient noise level at the listening post, the range may be much reduced.

(d) **Directional properties.**

The sound pressure level of a directional whistle shall not be more than 4 dB below the prescribed sound pressure level on the axis at any direction in the horizontal plane within +/− 45 degrees of the axis. The sound pressure level at any other direction in the horizontal plane shall not be more than 10 dB below the prescribed sound pressure level on the axis, so that the range in any direction will be at least half the range on the forward axis. The sound pressure level shall be measured in that 1/3rd octave band which determines the audibility range.

(e) **Positioning of whistles.**

When a directional whistle is to be used as the only whistle on a vessel, it shall be installed with its maximum intensity directed straight ahead.

A whistle shall be placed as high as practicable on a vessel, in order to reduce interception of the emitted sound by obstructions and also to minimize hearing damage risk to personnel. The sound pressure level of the vessel’s own signal at listening posts shall not exceed 110 dB(A) and so far as practicable should not exceed 100 dB(A).

(f) **Fitting of more than one whistle.**

If whistles are fitted at a distance apart of more than 100 metres, it shall be so arranged that they are not sounded simultaneously.

(g) **Combined whistle systems.**

If, due to the presence of obstructions, the sound field of a single whistle or of one of the whistles referred to in paragraph (f) above is likely to have a zone of greatly reduced signal level, it is recommended that a combined whistle system be fitted so as to overcome this reduction. For the purposes of the rules, a combined whistle system is to be regarded as a single whistle. The whistles of a combined system shall be located at a distance apart of not more than 100 metres and arranged to be sounded simultaneously. The frequency of any one whistle shall differ from those of the others by at least 10 Hz.

2. **Bell or gong.**

(a) **Intensity of signal**

A bell or gong, or other device having similar sound characteristics shall produce a sound pressure level of not less than 110 dB at a distance of 1 metre from it.

(b) **Construction**

Bells and gongs shall be made of corrosion-resistant material and designed to give a clear tone. The diameter of the mouth of the bell shall be not less than 300 mm for vessels of 20 metres or more in length. Where practicable, a power-driven bell striker is recommended to ensure constant force, but manual operation shall be possible. The mass of the striker shall be not less than 3% of the mass of the bell.

3. **Approval**

The construction of sound signal appliances, their performance and their installation on board the vessel, shall satisfy the requirements set out by the Norwegian Maritime Directorate. Equipment covered by the regulations of 29 December 1998 No. 1455 concerning marine equipment shall be type-approved by a Notified Body and marked in accordance with the said regulations.

Amended by regulations of 29 December 1998 No. 1460 (in force 1 January 1999) and 31 August 2006 No. 1016.
ANNEX IV

Distress signals

1. The following signals, used or exhibited either together or separately, indicate distress and need of assistance:
   (a) a gun or other explosive signal, fired at intervals of about one minute;
   (b) a continuous sounding, with any fog-signalling apparatus;
   (c) rockets or shells, throwing red stars fired one at a time at short intervals;
   (d) a signal made by radiotelegraphy or by any other signalling method consisting of the group ... – – – ...
      (SOS) in the Morse Code;
   (e) a signal sent by radiotelephony, consisting of the spoken word «Mayday»;
   (f) the International Code of Signals of distress indicated by N.C.;
   (g) a signal consisting of a square flag having above or below it a ball or anything resembling a ball;
   (h) a flame on the vessel (as from a burning tar barrel, oil barrel, etc.);
   (i) a rocket parachute flare or a hand flare showing a red light;
   (j) a smoke signal, giving off orange-coloured smoke;
   (k) slowly and repeatedly raising and lowering arms outstretched to each side;
   (l) the radiotelegraph alarm signal;
   (m) the radiotelephone alarm signal;
   (n) signals transmitted by emergency position-indicating radio beacons.
   (o) approved signals transmitted by radiocommunication systems, including survival craft radar transponders.

2. The use or exhibition of any of the foregoing signals, except for the purpose of indicating distress and need for assistance, is prohibited. The use of other signals which may be confused with any of the above signals is prohibited as well.

3. Attention is drawn to the relevant Sections of the International Code of Signals, the Merchant Ship Search and Rescue Manual and the following signals:
   (a) a piece of orange-coloured canvas with either a black square and circle or other appropriate symbol (for identification from the air);
   (b) a dye marker.
